## About me

Currently working as a Full-Stack developer at eNubes.

Responsible and dedicated in my projects, always looking for excellence in what I propose. Good teamwork, good problem-solving skills and great hunger for knowledge and growth.

## Experience

### Full-Stack Developer at eNubes

December 2020 - Present

Development and maintenance of several projects in the PHP framework Codeigniter, both in version 3 and 4. Bootstrap, Metronic and derivatives for the Front.

Microsites, CMS, web applications, virtual events, virtual fairs and events, Ecommerce webs, microsites, communication spaces, etc.

### Full-Stack Developer at Innovaly Group

Working on the development, layout and design of their automated machines management page developed in PHP with the Codeigniter framework and Bootstrap on the Front side.

Updating and maintenance of this web application.

Hosting Management

Elaboration of the programming manual.

Creation of a cash withdrawal system, cash counts, cash withdrawals, introduction of card sales, invoices or receipts and bank deposits. All with on-site data matching with the collected machines and role system.

POS project for store sales of each center, connected with the above mentioned system.
